07/10/2000

ABOUT ME

I am a video game enthusiast that would describe himself as a passionate and energetic individual, with eager to learn as much as possible and to evolve as a professional.

I left computer science to pursue other studies that fitted me more, since its methodology and content didn't motivate me.

On the other hand, I am able to spend hours and hours on projects related to web design and gaming without even realizing, that's when I decided I wanted to invest myself to it.

With me in your team, you can expect total dedication, adaptability and a fast learning professional.

COMPETENCIES

- Critical thinking.
- Willingness.
- Ambition.
